1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

Product information

Trade name: 830-2506 CAL-TINT®II INTERIOR YELLOW
Use of the Substance / Preparation: Aqueous colorant
Company: Chromaflo Technologies Corporation
2600 Michigan Avenue
Ashtabula, OH  44005-0816
USA

Telephone: 440-997-5137
Telefax: 440-992-3613

US: CHEMTREC EMERGENCY NUMBER: 800-424-9300
CANADA: CANUTEC EMERGENCY NUMBER: 613-996-6666
Product Regulatory Services: 440-536-9691

2. HAZARDS IDENTIFICATION

*** EMERGENCY OVERVIEW ***

Form-paste  Color-yellow  Odor-Glycol odor.

CAL-TINT colorants may cause eye, skin and respiratory tract irritation. May be harmful if swallowed.

POTENTIAL HEALTH EFFECTS

Eye contact
According to test results on similar colorant base mixtures, this CAL-TINT colorant is classified as a moderate eye irritant. May cause tearing, reddening and/or swelling.

Skin Contact
CAL-TINT colorants may cause irritation.

Inhalation
CAL-TINT colorants may cause irritation. Overexposure to aerosols or mists containing ethylene glycol may cause lung irritation. See exposure limit (section 8).

Ingestion
May be harmful if swallowed.
Ingestion of ethylene glycol may cause abdominal discomfort or pain, nausea, vomiting, dizziness, drowsiness, irritability and central nervous system effects. Swallowing large volumes of ethylene glycol causes severe kidney damage and cardiopulmonary effects (metabolic acidosis) which may be fatal. The human oral lethal dose is approximately 1.6 g/kg. Ingestion of ethylene glycol can cause neurological impairment. Repeated ingestion of ethylene glycol can cause bone marrow, liver, and sperm effects. Ingestion of excessive amounts of diethylene glycol causes abdominal discomfort or pain, nausea, vomiting, dizziness, central nervous system effects, kidney damage and cardiopulmonary effects (metabolic acidosis) which may be fatal (estimated human oral lethal dose, 1.0 to 1.2 g/kg) and may cause liver effects.

**Chronic Health Hazard**

Ethylene glycol may aggravate an existing kidney disease. Repeated skin contact with ethylene glycol may, in a very small proportion of cases, cause sensitization with the development of allergic contact dermatitis. The incidence is significantly less than 1% with the undiluted material. Repeated inhalation of ethylene glycol mist may produce signs of central nervous system involvement, particularly dizziness and drowsiness. Short term exposures to talc may cause lung irritation. Long term excessive exposure to talc dust may cause talcosis, a pulmonary fibrosis which in turn may lead to severe and permanent damage to the lungs. NTP Toxicology and Carcinogenesis Studies of Talc revealed that there is some evidence of carcinogenic activity in male rats and clear evidence of carcinogenic activity in female rats. There was no evidence of carcinogenic activity in male or female mice. In long term dietary studies of tributyl phosphate in rats, urinary bladder tumors, urinary bladder hyperplasia and increased liver weight were noted. Benign liver tumors, liver enlargement and urinary bladder hyperplasia were observed in long term studies in mice. Because this product is a free-flowing liquid or paste, dust inhalation is not an expected route of exposure.

### 3. COMPOSITION/INFORMATION ON INGREDIENTS

**Information on ingredients / Hazardous components**

| Talc, Magnesium silicate hydrate | CAS-No. 14807-96-6 | Percent (Wt./ Wt.) 30 - 60 % |
| ethanediol; ethylene glycol | CAS-No. 107-21-1 | Percent (Wt./ Wt.) 10 - 30 % |
| Diethylene glycol | CAS-No. 111-46-6 | Percent (Wt./ Wt.) 5 - 10 % |
| tributyl phosphate | CAS-No. 126-73-8 | Percent (Wt./ Wt.) 1 - 5 % |
| NJTSR No.56705700001-5704P | Trade Secret | Percent (Wt./ Wt.) 0.1 - 1 % |

**Other information**

This material is classified as hazardous under OSHA regulations.
4. FIRST AID MEASURES

**Inhalation**
If inhaled, remove to fresh air. If breathing is difficult, give oxygen. If unconscious, evaluate the need for artificial respiration. Get immediate medical attention.

**Skin contact**
Flush skin with plenty of water. Remove contaminated clothing. Obtain medical attention if irritation develops or persists.

**Eye contact**
In case of contact, immediately flush eyes with plenty of water for at least 15 minutes or until all material has been removed. Obtain medical attention.

**Ingestion**
If swallowed, get medical attention immediately. Only induce vomiting if directed by a physician. Never give anything by mouth to an unconscious person.

5. FIRE-FIGHTING MEASURES

**Suitable extinguishing media**
In case of fire, use water (flood with water), dry chemical, CO2 or "alcohol" foam.

**Specific hazards during fire fighting**
Contains material that can burn in fire if contained water is evaporated by heat or fire.

**Further information**
As in any fire, wear self-contained positive-pressure breathing apparatus, (MSHA/NIOSH approved or equivalent) and full protective gear. Containers can build up pressure if exposed to heat (fire). Cool with water spray.

6. ACCIDENTAL RELEASE MEASURES

**Personal precautions**
Wear personal protective equipment; see section 8.

**Environmental precautions**
Obey relevant local, state, provincial and federal laws and regulations. Do not contaminate any lakes, streams, ponds, groundwater or soil.

**Methods for cleaning up**
Ventilate area. Absorb spill with inert material and place in a chemical waste container.

7. HANDLING AND STORAGE

**Handling**

**Safe handling advice**
Avoid contact with eyes, skin and clothing. Use with adequate ventilation. Avoid breathing vapor or mist. Follow all MSDS/label precautions even after container is emptied because it may retain product residues. Wash thoroughly after handling.
Storage

Requirements for storage areas and containers
Keep in a dry, cool place.
Keep container closed when not in use.
Residual vapors might explode on ignition; do not apply heat, cut, drill, grind or weld on or near this container.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Component occupational exposure guidelines

• tributyl phosphate
  CAS-No. 126-73-8
  Control parameters 0.2 ppm
                      5 mg/m³
                      0.2 ppm
                      2.5 mg/m³
  Time Weighted Average (TWA): (ACGIH) PEL: (OSHA Z1)

• ethanediol; ethylene glycol
  CAS-No. 107-21-1
  Aerosol.
    40 ppm
    100 mg/m³
  Ceiling Limit Value: (ACGIH)

• Talc, Magnesium silicate hydrate
  CAS-No. 14807-96-6
  Respirable fraction.
  The value is for particulate matter containing no asbestos and <1% crystalline silica.
  2 mg/m³
    Time Weighted Average (TWA): (ACGIH)
  20 millions of particles
  per cubic foot of air
  2.4 millions of particles
  per cubic foot of air
  Respirable.
  The exposure limit is calculated from the equation, 250/(%SiO₂+5), using a value of
  100% SiO₂. Lower percentages of SiO₂ will yield higher exposure limits.
  0.1 mg/m³
  Respirable.
  The exposure limit is calculated from the equation, 10/(%SiO₂+2), using a value of
  100% SiO₂. Lower percentages of SiO₂ will yield higher exposure limits.
Other information
The exposure value for ethylene glycol is given as an aerosol.
The AIHA WEEL for diethylene glycol is 50 PPM for total vapor and aerosol and 10 mg/m3 for aerosol alone (eight hour time-weighted averages).

Engineering measures
Use only in well-ventilated areas.

Personal protective equipment

Respiratory protection
A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 or applicable federal/provincial requirements must be followed whenever workplace conditions warrant respirator use.
NIOSH's "Respirator Decision Logic" may be useful in determining the suitability of various types of respirators.

Hand protection
Use impermeable gloves.

Eye protection
Chemical resistant goggles must be worn.

Skin and body protection
A safety shower and eye wash fountain should be readily available.
To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a hazard assessment in accordance with the OSHA PPE Standard (29CFR1910.132) be conducted before using this product.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance
Form: paste
Color: yellow
Odor: Glycol odor.

Safety data
pH: 8.0 - 9.3
Boiling point/range: > 100 °C
Relative density: 1.4
Solubility/qualitative: Solubility in water: Dispersible.
Viscosity, dynamic: 70 - 85 KU (25 °C)

Solvents and Volatiles Data
% VOC (gm/l): 590
Evaporation rate Slower than butyl acetate

10. STABILITY AND REACTIVITY

Conditions to avoid Not applicable.

Materials to avoid strong acids, oxidizing substances
sodium hypochlorite

11. TOXICOLOGICAL INFORMATION

Component Acute oral toxicity ethanediol; ethylene glycol
107-21-1
LD50 Rat(female): 4000 mg/kg

Diethylene glycol
111-46-6
LD50 Rat: 20760 mg/kg

tributyl phosphate
126-73-8
LD50 Rat: 1390 mg/kg
(literature value)

NJTSR No.56705700001-5704P
Trade Secret
LD50 Rat: 5700 mg/kg

Component Acute inhalation toxicity tributyl phosphate
126-73-8
LC50 Rat: 28.0 mg/l / 1 h
(literature value)

Component Acute dermal toxicity ethanediol; ethylene glycol
107-21-1
LD50 Rabbit: 10500 mg/kg

Diethylene glycol
111-46-6
LD50 Rabbit: 13300 mg/kg

tributyl phosphate
126-73-8
LD50 Rabbit: > 10000 mg/kg

Component Skin irritation tributyl phosphate
126-73-8
Rabbit / 4 h
slightly irritating
Component  Eye irritation  tributyl phosphate  126-73-8  Rabbit  slightly irritating

Component  Repeated dose toxicity  Talc, Magnesium silicate hydrate  14807-96-6  Inhalation Rat(male)  Testing period: 791 d  LOAEL: 0.006 mg/l  target organ/effect: Lungs  
ethanediol; ethylene glycol  107-21-1  Chronic ingestion of an ingredient in this product has been shown to cause adverse effects on the peripheral nervous system of laboratory animals.

Component  Gentoxicity in vitro  tributyl phosphate  126-73-8  In vitro tests have shown mutagenic effects.

Component  Carcinogenicity assessment  Talc, Magnesium silicate hydrate  14807-96-6  Short term exposures to talc may cause lung irritation. Long term excessive exposure to talc dust may cause talcosis, a pulmonary fibrosis which in turn may lead to severe and permanent damage to the lungs. NTP Toxicology and Carcinogenesis Studies of Talc revealed that there is some evidence of carcinogenic activity in male rats and clear evidence of carcinogenic activity in female rats. There was no evidence of carcinogenic activity in male or female mice.

Component  Teratogenicity assessment  ethanediol; ethylene glycol  107-21-1  Ethylene glycol has been shown to produce dose-related teratogenic effects in rats and mice when given by gavage or in drinking water at high concentrations or doses. However, there is currently no available information to suggest that ethylene glycol has caused birth defects in humans.

Component  General Toxicity Information  ethanediol; ethylene glycol  107-21-1  Ethylene glycol may aggravate an existing kidney disease. Repeated skin contact with ethylene glycol may, in a very small proportion of cases, cause sensitization with the development of allergic contact dermatitis. The incidence is significantly less than 1% with the undiluted material. Repeated inhalation of ethylene glycol mist may produce signs of central nervous system involvement, particularly dizziness and drowsiness.
Diethylene glycol
111-46-6
According to long-term animal inhalation studies, very high concentrations of diethylene glycol vapors caused central nervous system effects in mice and rats. However, an extensive review of the literature shows that no such effects have been documented in humans (Patty's Industrial Hygiene and Toxicology, 1982, Third Revised Ed., Vol 2c, p 3838). In a continuous breeding study of mice, continued ingestion of large amounts of diethylene glycol (6 g/kg/day) caused an adverse effect on fertility and some embryotoxic and fetotoxic effects concurrent with some maternal toxicity. The relevance of these very high doses to humans is uncertain.

tributyl phosphate
126-73-8
In long term dietary studies of the alkyl phosphate in rats, urinary bladder tumors, urinary bladder hyperplasia and increased liver weight were noted. Benign liver tumors, liver enlargement and urinary bladder hyperplasia were observed in long term studies in mice.

12. ECOLOGICAL INFORMATION

General Ecological Information
No ecotoxicological studies are available.

13. DISPOSAL CONSIDERATIONS

WASTE DISPOSAL
Advice on disposal
Waste must be disposed of in accordance with federal, state, provincial and local regulations. CONTAINER DISPOSAL: Empty containers by removing the top and inverting to allow all free-flowing product to drain. To meet regulatory criteria, the container is considered empty when less than 3% remains in the container. Additional special handling is not typically required and the empty container can be discarded with other non-hazardous trash. Note: Local disposal regulations may be more stringent and require additional restrictions or precautions. Customers should check with their local disposal company, municipal or state authority. Recycle of plastic or metal containers may require clean rather than empty containers. In this case the containers can be rinsed with water until the containers are considered generally product free.

14. TRANSPORT INFORMATION

D.O.T. Road/Rail
Class 9
UN-No 3082
Packing group III
Proper shipping name Environmentally hazardous substance, liquid, n.o.s.
Loading instructions/Remarks

IATA_C  Not dangerous according to transport regulations.
IATA_P  Not dangerous according to transport regulations.
IMDG  Not dangerous according to transport regulations.
CFR_INWTR  USA: Not regulated for transport when package contains less than the reportable quantity listed in section 15 of the msds.
CFR_RAIL  USA: Not regulated for transport when package contains less than the reportable quantity listed in section 15 of the msds.
CFR_ROAD  USA: Not regulated for transport when package contains less than the reportable quantity listed in section 15 of the msds.

15. REGULATORY INFORMATION

Information on ingredients / Non-hazardous components

This product contains the following non-hazardous components

Water  
CAS-No.  7732-18-5  Percent (Wt./Wt.)  10 - 30 %

NJTSR No.56705700001-5578P  
CAS-No.  Trade Secret  Percent (Wt./Wt.)  5 - 10 %

ARYL POLYGLYCOL ETHER  
CAS-No.  Percent (Wt./Wt.)  1 - 5 %

Chlorite  
CAS-No.  71949-90-1  Percent (Wt./Wt.)  1 - 5 %

US Federal Regulations

OSHA

If listed below, chemical specific standards apply to the product or components:

• None listed

Clean Air Act Section (112)

If listed below, components present at or above the de minimus level are hazardous air pollutants:

• ethanediol; ethylene glycol  
CAS-No.  107-21-1

CERCLA Reportable Quantities

If listed below, a reportable quantity (RQ) applies to the product based on the percent of the named component:

• ethanediol; ethylene glycol  
CAS-No.  107-21-1  
Reportable Quantity  20833 lbs
SARA Title III Section 311/312 Hazard Categories
The product meets the criteria only for the listed hazard classes:

- Acute Health Hazard
- Chronic Health Hazard

SARA Title III Section 313 Reportable Substances
If listed below, components are subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

- ethanediol; ethylene glycol
  CAS-No. 107-21-1

Toxic Substances Control Act (TSCA)
If listed below, non-proprietary substances are subject to export notification under Section 12 (b) of TSCA:

- None listed

State Regulations

California Proposition 65
A warning under the California Drinking Water Act is required only if listed below:

- None listed
International Chemical Inventory Status

Unless otherwise noted, this product is in compliance with the inventory listing of the countries shown below. For information on listing for countries not shown, contact the Product Regulatory Services Department.

- Europe (EINECS/ELINCS) Listed/registered
- USA (TSCA) Listed/registered
- Canada (DSL) Listed/registered
- Australia (AICS) Listed/registered
- Japan (MITI) Not listed/Not registered
- Korea (TCCL) Not listed/Not registered
- Philippines (PICCS) Listed/registered
- China Listed/registered
- New Zealand Listed/registered
